Radial Load OK

POINT
Selection Notes

- The actuator specifications display the payload's maximum value, but it varies depending on the acceleration and speed. Please refer to "Table of Payload by Speed/ Acceleration" for more details.
- The radial cylinder has a built-in guide. For the allowable load mass, refer to the "Rod tip allowable load mass" graph.
- The cable joint connector is not splash-proof so install it where it will not be exposed to water.
- Special attention needs to be paid to the mounting orientation. Please refer to P1-361 for details.
- Please refer to P1-431 for push-motion operation.
- When connecting to the RCON, a conversion unit or conversion cable will be required. Please refer to P7-41 for details.

Main Specifications

	Item	Description		
Lead	Ball screw lead (mm)	10	5	2.5
	Maximum payload (energy-saving mode disabled) (kg)	64	120	240
Horizontal	Max. speed (mm / s)	200	100	50
	Min. speed (mm / s)	13	7	4
Speed/ acceleration/ deceleration	Rated acceleration/deceleration (G)	0.04	0.02	0.01
	Max. acceleration/deceleration (G)	0.04	0.02	0.01
Vertical	Maximum payload (energy-saving mode) (kg)	64	80	120
	Max. speed (mm / s)	130	100	50
Speed/ acceleration/ deceleration	Min. speed (mm / s)	13	7	4
	Rated acceleration/deceleration (G)	0.04	0.02	0.01
Push force	Max. thrust force when pushing (N)	1500	3000	6000
	Max. speed when pushing (mm/s)	10	10	10
Brake	Brake specification	Non-excitation actuating solenoid brake		
	Brake force (kgf)	64	80	120
Stroke	Min. stroke (mm)	50	50	50
	Max. stroke (mm)	800	800	800
	Stroke pitch (mm)	50	50	50

(Note 1) When a radial load is received with an external guide.

Item	Description
Driving system	Ball screw φ20mm (Lead 2.5/10) Rolled C10
Positioning repeatability	Ball screw φ16mm (Lead 5) Rolled C10
Lost motion	±0.02mm
Main material	0.1mm or less
	Base
	Aluminum, white anodized
	Front bracket
Rod	Aluminum, white anodized
	Seal
	Urethane rubber (U)
	Actuator cable
Rod non-rotation accuracy (Note 2)	Vinyl chloride (PVC)
	40mm Material: Aluminum Hard anodized
	0 degrees
	Ambient operation temperature/humidity
0~40°C, 85%RH or less (Non-condensing)	
Degree of protection	
IP65	
Vibration & shock resistance	
4.9m/s ² 100Hz or less	
Overseas standards	
CE marking, RoHS	
Motor type	
Stepper motor	
Encoder type	
Battery-less absolute	
Number of encoder pulses	
800 pulse/rev	

(Note 2) This indicates the rod displacement angle with no load.

Table of Payload by Speed/Acceleration

The unit of the payload is kg.

(Note) < > indicates vertical use.

Correlation of push force and current limit value

Rod Deflection (Reference Values)

The graph below shows the measurements of how much a horizontally mounted rod would deflect when a load is applied to the end of the rod, excluding deflection due to the rod's own weight.

■ Warnings for push operation

Due to the buckling load of the ball screw, the push force of some models is limited. Refer to the table below. Just put a (N) above the top right corner of the graph.

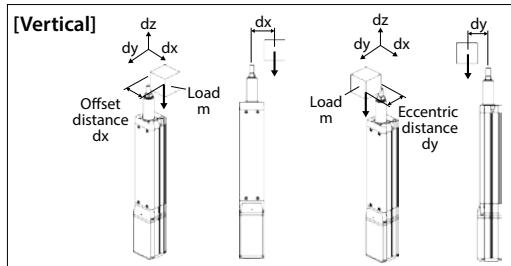

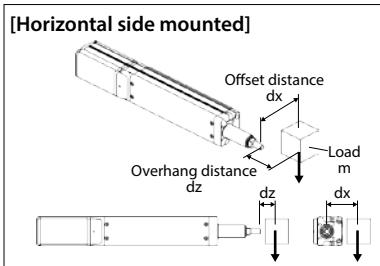

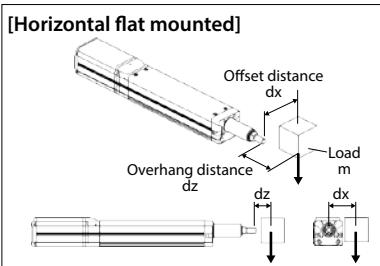

Lead	Stroke					
	550mm or less	600mm or less	650mm or less	700mm or less	750mm or less	800mm or less
10	As shown in the push force graph					
5	As shown in the graph	2900	2500	2200	2000	1800
2.5	As shown in the push force graph					
				5900	5400	

See the table below as a guide for the upper limit of the number of pushing operations when operating at the maximum push force and traveling a distance of 1mm.

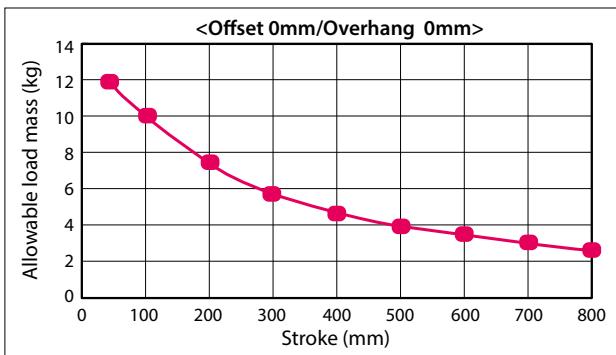

Lead (Type)	2.5	5	10
Number of push cycles	1.4 million times	25 million times	157.6 million times

Note: The maximum number of push cycle varies depending on operating conditions such as impact shock and vibration. The above number assumes that there is no impact shock or vibration.

Rod tip allowable load mass

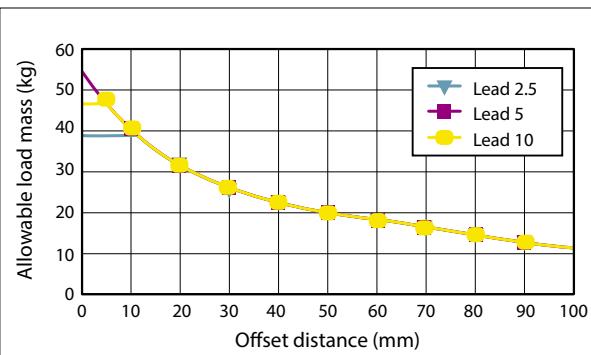

■ Horizontal

Allowable load calculation conditions:
Load mass corresponding to a product service life of 5,000km,
considering moments generated by acceleration/deceleration.
(Acceleration 0.04G, speed 250mm/s)

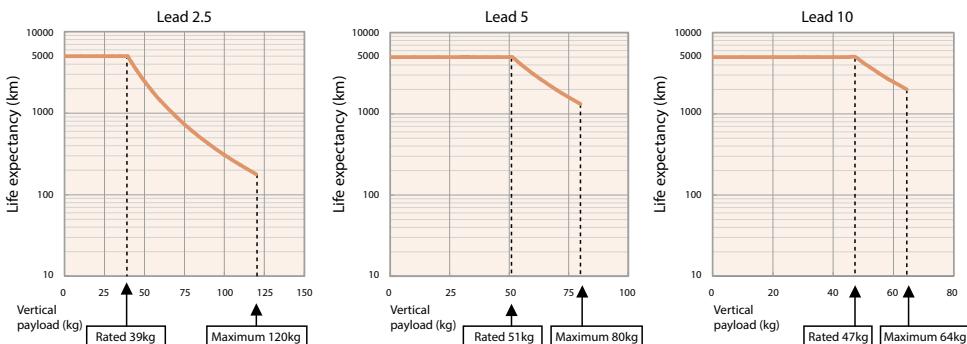

■ Vertical

Load mass corresponding to a product service life of 5,000km,
considering moments generated by acceleration/deceleration.
(Acceleration 0.04G, speed 167mm/s)

Correlation between the vertical payload and life expectancy

Since the RCP5W-RA10C has a larger maximum thrust than other types, its life expectancy varies significantly depending on the payload and push force applied when the actuator is mounted vertically. When selecting a type using the "Table of Payload by Speed/ Acceleration" or "Correlation of push force and current limit value", please check the life expectancy in the below graphs.

Note) The rated value is the maximum payload for a running life of 5,000 km. The maximum value represents the maximum payload that can be applied. Please note that the life expectancy will be shortened , as shown in the above graphs, when operating beyond the rated values.

Dimensions

(Note) Connect the motor / encoder cable to the pigtail cable connector.

(Note) When returning to the home position, the rod will move to M.E., so be careful of interference from surrounding objects.

(Note) The direction of width across flats varies depending on the product. Those flats cannot be used for reference plane.

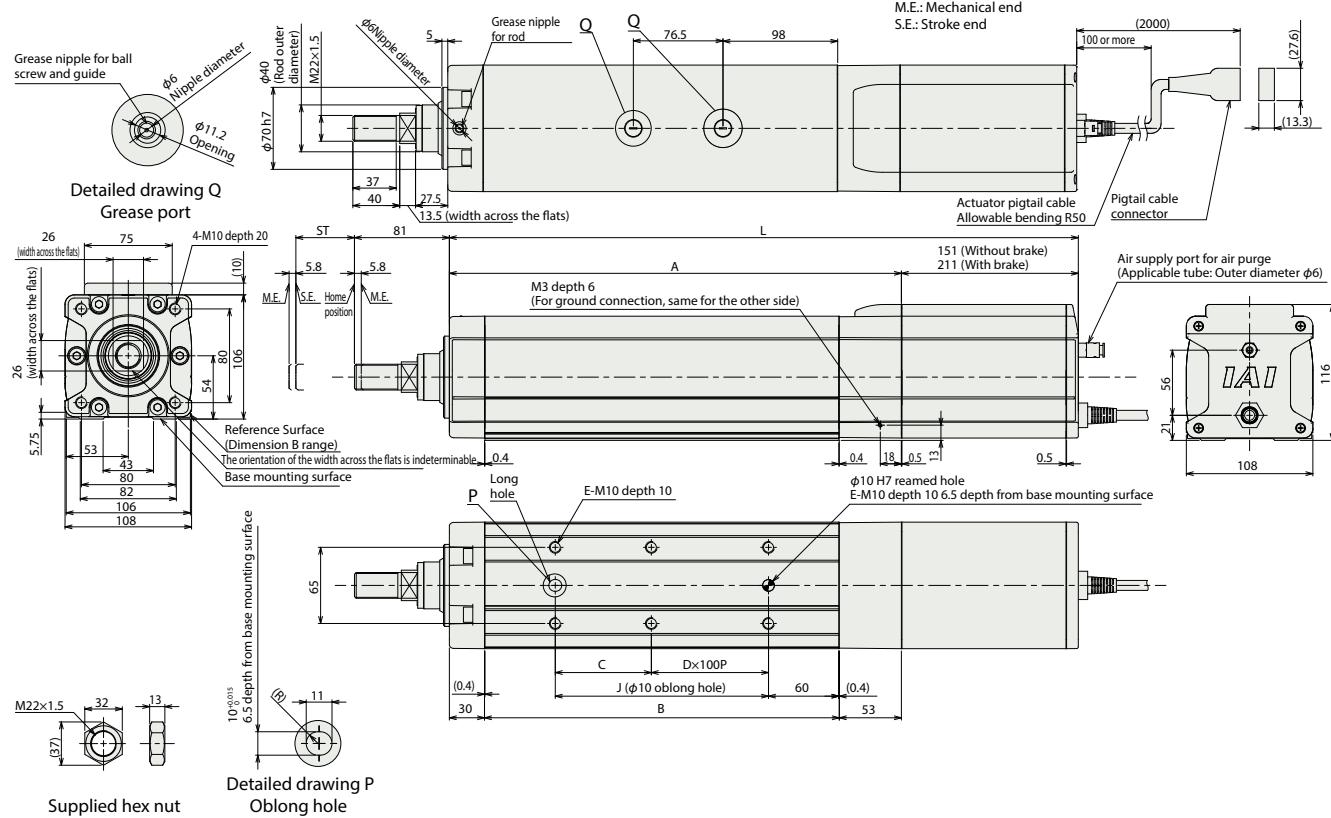

(Note) When mounting the actuator using the front housing and flange, make sure that no external force is applied to the actuator.

(Note) The orientation of the width across flats is indeterminable.

Pressing Operation

As with pneumatic cylinders, push motion is a function to keep holding rods and sliders pressed against workpiece etc. Some models may not be used depending on the model of the actuator, so please make sure the following usage instructions and notes.

[Compatible with push motion]

Motor type	Series	Model	Availability	Notes
Pulse motor	EC/RCP6/ RCP5/RCP4 RCP3/RCP2	Slider type	○	Push motion is possible. (See note 1 below)
		Rod type	○	It is suitable for pushing operation. (See note 2 below)
	RCP2/RCP5	Belt type	✗	Since the pushing force of the belt is not stable, it can not be pushed.
Servo motor (DC24V)	RCA2/RCA	All model	△	See notes 2 below
Servo motor (AC100/200V)	RCS4	All model	△	See notes 2 below
	RCS3	RA4R/RA6R/RA7R/ RA8R/RA10R/ RA15R/RA20R	○	It is suitable for pushing operation.
		Other models	△	See notes 2 below
	RCS2	RA13R	○	It is suitable for pushing operation.
		Other models	△	See notes 2 below

[Notes]

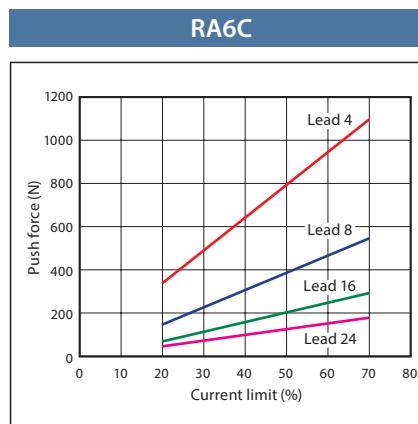

- When pushing with the slider type, it is necessary to consider the allowable dynamic moment of the guide. For details, please refer to the correlation diagram page of push force and current limit value of each slider type. (P1-433)
- RCP6 / RCP5 / RCP4 / RCP3 / RCP2 series are recommended for pushing applications. The RCP6 / RCP5 / RCP4 / RCP3 / RCP2 series are excellent in stopping stability at the time of pushing, and when compared with the RCA2 / RCA / RCS2 series of equivalent product cross section, a large pushing force can be obtained. Please contact our company for pressing on the RCA 2 / RCA / RCS 2 series.

[Adjustment of pressing force]

- The pushing force (pushing force) can be adjusted by changing the current limit value of the controller.
- Check the pushing force of each model referring to the "Correlation diagram of pushing force and current limit value" on P1-433 to P1-447 and select the model that suits the condition.

* Please confirm the following caution concerning "Correlation diagram of pressing force and current limit value".

(Note)

<Correlation diagram of pressing force and current limit value>

Caution

The correlation diagram between the pushing force and the current limit value shows the lower limit of the pushing force at each current limit value. Even if the current limit value is the same, depending on the aircraft, due to the individual differences of the motor and the variation of the mechanical efficiency, the pushing force lower limit value may be about 40% higher.

Except for the force control function, pushing force is not controlled by thrusting operation but by feedback control of current value. As a result, individual differences and variations may occur in the pressing force due to variations in the holding torque of the motor, individual differences such as ball screws and bearings, and changes in lubrication conditions. It is assumed that the holding torque of the motor itself has variations of about 30% due to the difference of the lot.

When accurate pushing force is required, please use actuator and controller which can use force control function. (See the right page)

Network Compatibility

Compatible with the majority of main field networks widely used over the world.

It is also highly compatible with FA devices such as PLCs and touch panels.

1 Compatible with main field networks

Direct connection is possible with main field networks such as DeviceNet or CC-Link, etc.

A position controller is available for an operation defined by movement specified with position number and direct coordinate value using the network.

(When defining coordinate values directly, there is no restriction for the number of positioning points.)

■ Compatible network and functions

As of December 2018

Features**1 The RCON is recommended for actuators containing 2 axes or more.**

A single Rcon driver unit of 22mm wide can accommodate actuators up to 2 axes, offering an ideal space-saving for the controller.

**2 Space saving of the controller up to 85% *1 is possible.**

*1 Compared with IAI products.

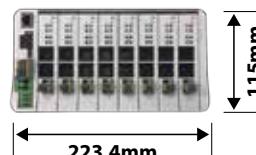

Compared with the type that connects one driver unit and 1-axis actuator, the space for the controller can be reduced up to 85%.

PCON-CB × 16 units

*2 The minimum distance required for the natural heat radiation for the controller.

RCON×16 axes connectable specification

Space-saving 85%

3 No.1 compatibility in the industry. Compatible with 7 field networks.

Compatible with wide selection of field networks.

4 Preventive & Predictive Maintenance Function

The RCON is equipped with a preventive maintenance function for capacitors, and a predictive maintenance function for fan units and actuators.

5 Operational at the controller operating temperature of 0 to 55°C.

When an optional fan unit is installed, the controller can be operable at 0 to 55°C without lowering the actuator operating duty.
(A fan unit is needed for every 2 driver units.)

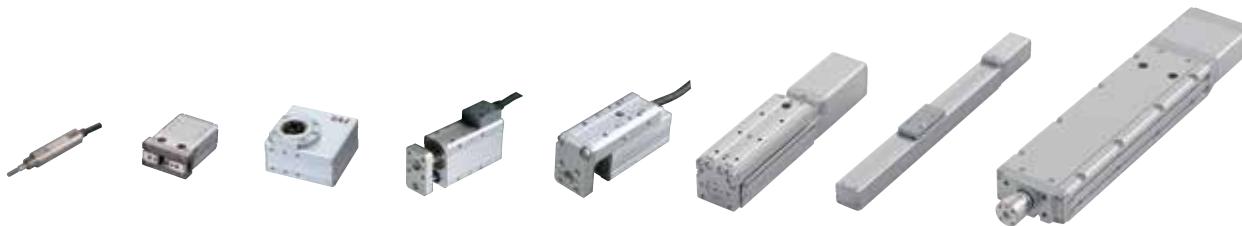

6 No.1 in the industry for the number of connectable actuators

Connectable with 332 IAI actuator models.*

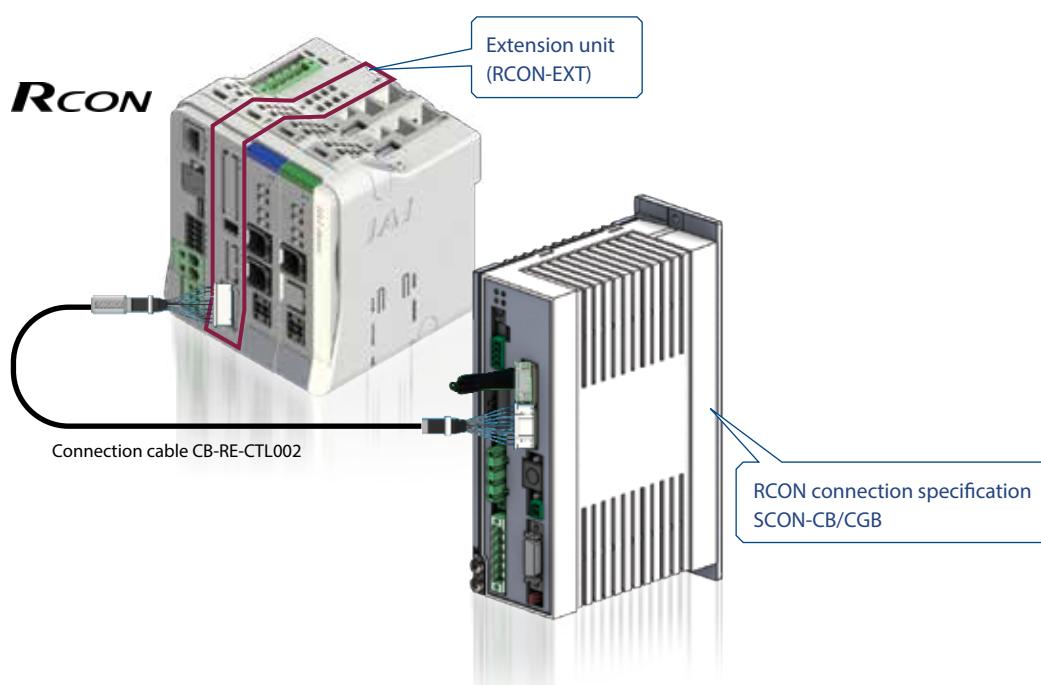

For RCP2/3/4/5/6, RCA/2, RCD, RCL series

Compatible with actuators that have not only battery-less absolute encoders but also actuators equipped with simple absolute encoders and incremental encoders.

For RCS2/3/4, IS(D) B, SSPA, LSA, NS, DDA series

When selecting an optional RCON connection specification (-RC) of the SCON, an actuator equipped with a high-capacity motor can be operated by connecting to the RCON extension unit (RCON-EXT).

■Actuator equipped with a high-capacity motor.

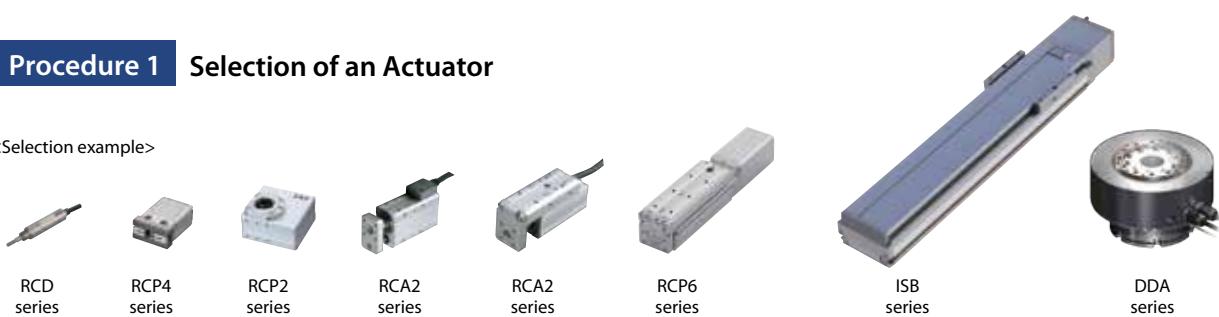

* IAI's General Catalog product series / types and models.
Except for the servo press actuator models, LSA-W21H, EC series, SCARA robots, TTA, ZR units and wrist units.
* As of December 2018.

Selection Procedure

Procedure 1 Selection of an Actuator

<Selection example>

Classify the actuator series into 2 categories according to the table below.

Controller	Actuator
RCON 	RCP2/3/4/5/6, RCA/2, RCD, RCL series <Selection example>
SCON-CB 	RCS2/3/4, IS(D)B, SSPA, LSA, NS, DDA series <Selection example>

* Please note that servo press actuator models, LSA-W21H, EC series, SCARA robots, TTA, ZR units and wrist units cannot be connected.

Procedure 2 Selection of a Gateway Unit

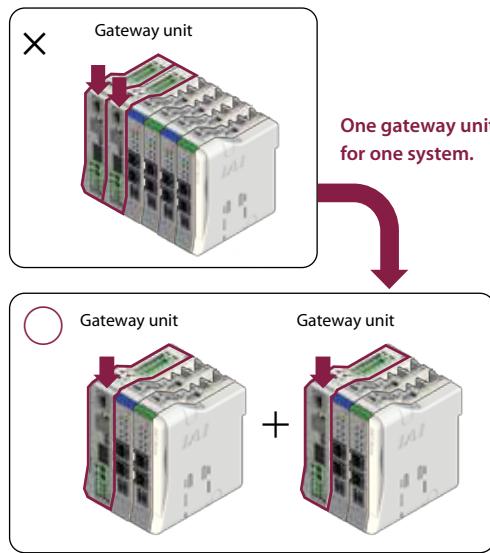

Select a gateway unit model according to the network type.

Caution

Only one gateway unit can be connected to one system.
If more than 2 units are used, divide it into 2.

Network type	Gateway unit model
DeviceNet	RCON-GW/GWG-DV
CC-Link	RCON-GW/GWG-CC
CC-Link IE Field	RCON-GW/GWG-CIE
PROFIBUS®	RCON-GW/GWG-PR
EtherCAT®	RCON-GW/GWG-EC
EtherNet/IP™	RCON-GW/GWG-EP
PROFINET®	RCON-GW/GWG-PRT

<Selection example>
Select 1

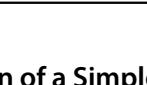

* GW --- Gateway unit of standard specification

GWG --- Gateway unit of safety category compliant type

The number of connectable actuator axes is 16 for one gateway unit.

Procedure 3 Selection of a Driver Unit

Select a suitable driver unit model and the required number according to the actuator series and motor type to be connected to the RCON.

Actuator		RCON driver unit			<Example of selection>		
Series	Motor type	External view	Number of connectable actuator axes	Model	Classification	Number of necessary units	
RCP2 RCP3 RCP4 RCP5 RCP6	20P, 28P 35P, 42P 56P	 Stepper motor	2-axis specification	RCON-PC-2	  RCP4 RCP2	1 unit	
			1-axis specification	RCON-PC-1	 RCP6	1 unit	
	High-thrust motor 56SP, 60P 86P		1-axis specification	RCON-PCF-1		—	
RCA RCA2 RCL	2 5 10 20, 20S 30	 AC servo motor	2-axis specification	RCON-AC-2	  RCA2 RCA	1 unit	
			1-axis specification	RCON-AC-1		—	
	3D	 DC brushless motor	2-axis specification	RCON-DC-2		—	
RCD	3D	 RCD	1-axis specification	RCON-DC-1	 RCD	1 unit	

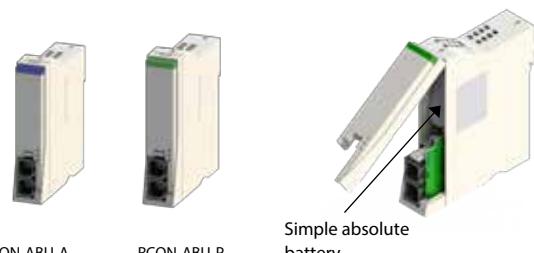

Procedure 4 Selection of a Simple Absolute Unit

When there are actuators of simple absolute specification, select the simple absolute units (RCON-ABU-A/P) in the same number as the actuator axes.

* Connect to the RCON controller using the cable (CB-ADPC-MPA005).

The cable is supplied with the sample absolute unit.

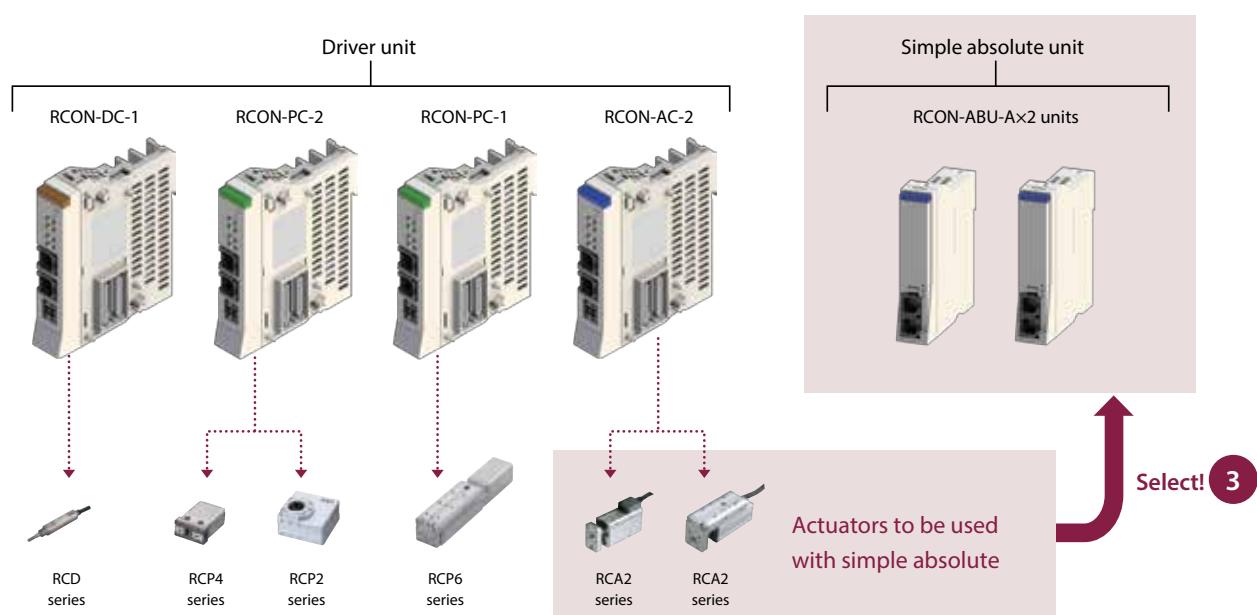

(Note) The operating ambient temperature of the simple absolute unit is 0 to 40°C.

Simple absolute
battery

<Example of selection>

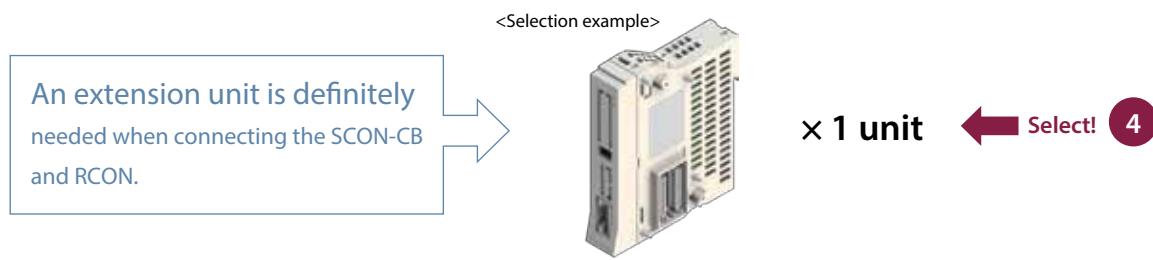

This example shows a selection of 2 axes of RCA2 series actuators as simple absolute specification.

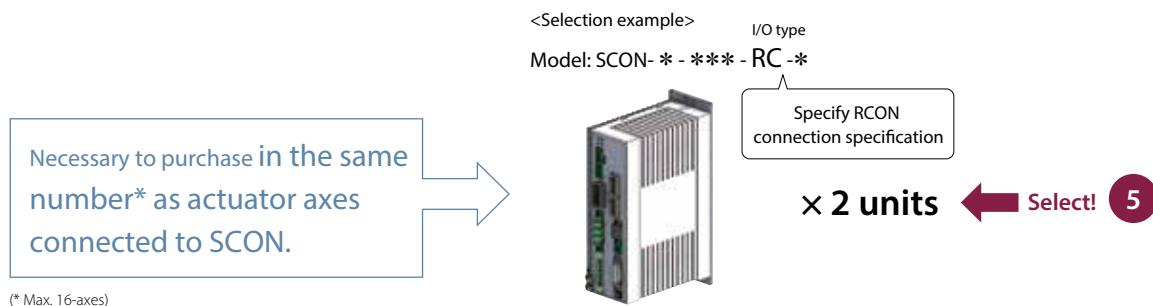

Procedure 5 Selection of an Extension Unit

When there is an actuator to be connected to the SCON-CB, select (1) to (3) as shown below.

(1) Extension unit (Model: RCON-EXT)

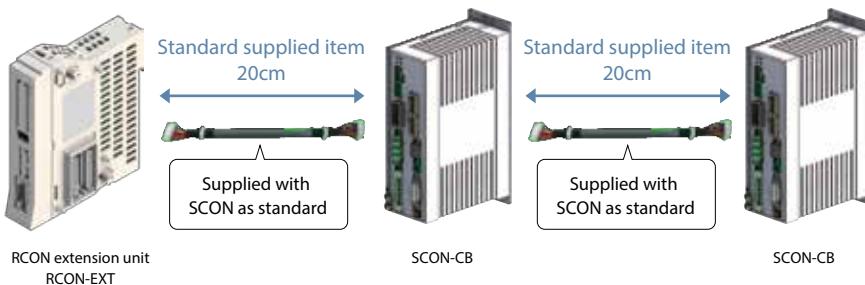

(2) RCON connection specification SCON-CB

(3) Connection cable between extension unit and SCON-CB.

A cable (CB-ER-CTL002) is supplied with the cable SCON-CB for connection with RCON.

Necessary to purchase only when the length of 20 cm is too short.

Model: CB-RE-CTL□□□
See 7-72

x Required number

Procedure 6 Calculation of Control Power (CP) of each unit

Confirm that the total control power capacity of the units selected so far is 9.0A or smaller.

Gateway unit

Confirmation method

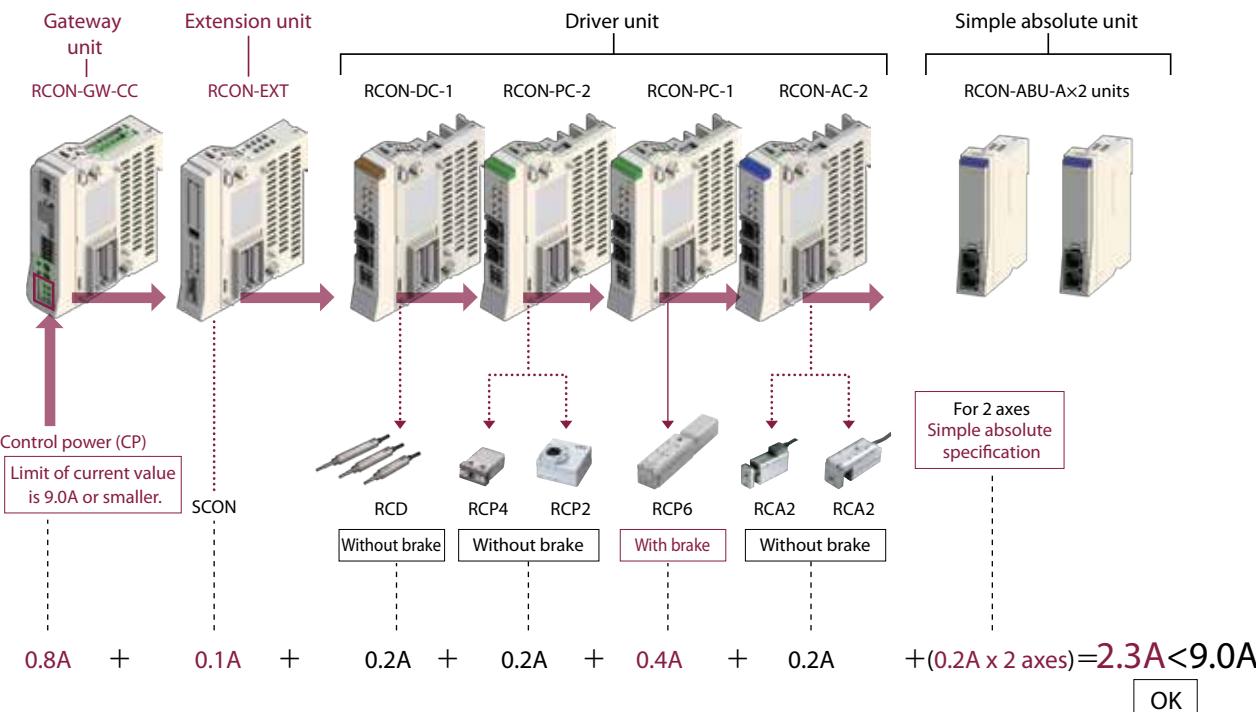

Add up values according to the "Table of motor power capacities" shown below.

Control power capacity (CP)
9.0A or smaller

List of control power capacities

Item	Specification	
Power voltage	24VDC±10%	<Selection example>
Control power capacity (CP) (Per driver unit)	Gateway unit (including terminal unit)	0.8A
	Driver unit (common in all types)	without Brake 0.2A with Brake (1-axis) 0.4A with Brake (2 axes) 0.6A
	Extension unit	0.1A
	Simple absolute unit (common in all types)	0.2A
		× 1 unit
		× 3 units
		× 1 unit
		× 1 unit
		× 1 axes

<Selection example>

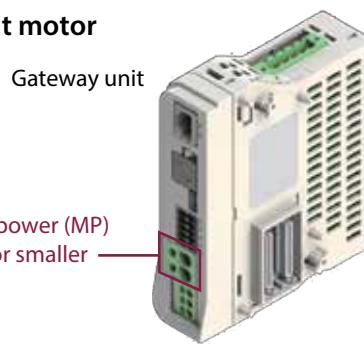

(9.0A or smaller is confirmed. If it is greater than 9.0A, another gateway unit is necessary.)

Procedure 7 Calculation of Motor Power Capacity (MP) of each unit motor

Confirm that the total motor power capacity of the driver units selected so far is 37.5A or smaller.

Confirmation method

Add up values according to the "Table of motor power capacities" shown below. Use the maximum current if shown in the table, otherwise use the rated current for calculation.

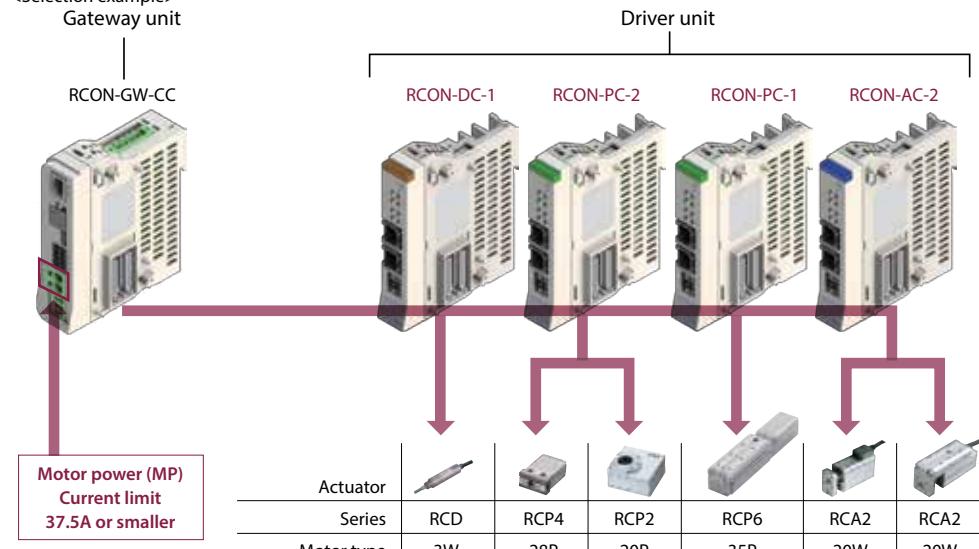

Motor power (MP)
37.5A or smaller

List of motor power capacity

Item	Actuator/driver unit			Rated current	Max. current		<Selection example>
	series	motor type			Energy-saving enabled		
Motor Power capacity (MP) (per actuator)	Stepper motor RCON-PC	RCP2	20P/20SP/28P	Without Power CON	0.8A	—	x1 axis
		RCP3	28P*		1.9A	—	
		RCP4	28P/35P/42P/	Without Power CON	1.9A	—	x2 axes
	AC servo motor RCON-AC	RCP5	42SP/56P		2.3A	—	
		RCP6	56SP/60P/86P	With Power CON	—	3.9A	
		RCP2	5W		5.7A	—	
Motor Power capacity (MP) (per actuator)	AC servo motor RCON-AC	RCA	10W	Standard/ High acceleration/deceleration/ Energy saving	1.0A	—	3.3A
		RCA2	20W		1.3A	2.5A	4.4A
		RCA2	20W(20S)		1.3A	2.5A	4.4A
		RCA2	30W		1.7A	3.4A	5.1A
		RCL	2W	Standard/ High acceleration/deceleration	1.3A	2.2A	4.0A
		RCL	5W		0.8A	—	4.6A
		RCL	10W		1.0A	—	6.4A
		RCD	3W	Standard	1.3A	—	6.4A
		RCD	3W		0.7A	—	1.5A
		x1 axis					

* for RCP2-RA3 and RCP2-RGD3

<Selection example>
Gateway unit

$$1.5A + 3.9A + 0.8A + 3.9A + 4.4A + 4.4A = 18.9A < 37.5A$$

(37.5A or smaller is confirmed. If it is greater than 37.5A, another gateway unit is necessary.)

OK

Procedure 8 Selection of a Fan Unit

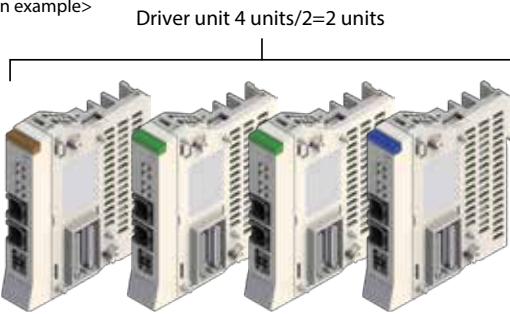

When the controller operating environment could exceed 40°C, it is necessary to install a fan unit. (up to 55°C)

The number of fan units is one half of the total number of the driver units.

If the number of the driver units is an odd number, add 1 to the total odd number for the calculation purpose.

When placing an order, specify the gateway unit model.

<Selection example>

Driver unit 4 units/2=2 units

Fan unit [RCON-FU]

Select! 6

Even when a fan unit is installed, the ambient operating environment for the simple absolute unit is 0 to 40°C.

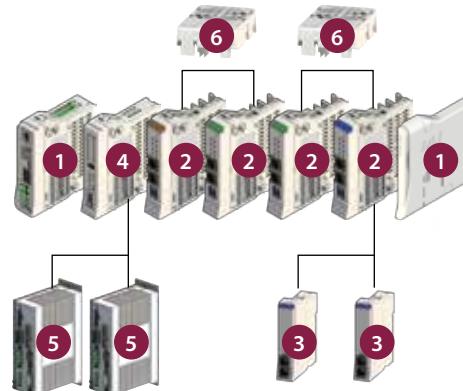

Procedure 9 Unit Model to Order

Please specify each unit model number for ordering.

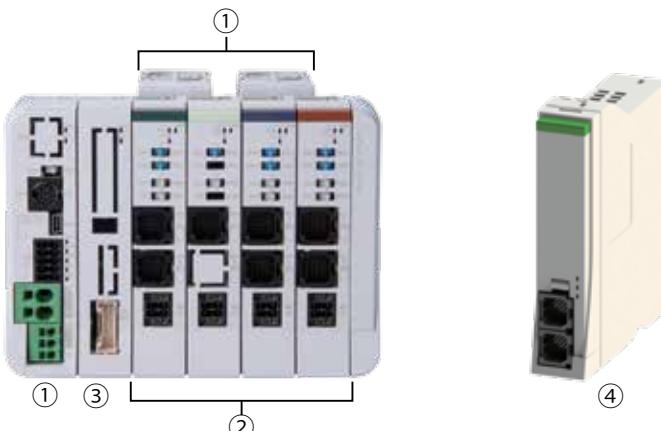

<Selection example>

Gateway unit (with 2 fan units) [RCON-GW-CC-FU2]	1	6
Extension unit [RCON-EXT]	4	
Driver unit [RCON-DC-1]	2	
Driver unit [RCON-PC-2]	2	
Driver unit [RCON-PC-1]	2	
Driver unit [RCON-AC-2]	2	
Simple Absolute unit [RCON-ABU-A] x 2 units	3	
RCON connection specification SCON [SCON-*-*-RC] x 2 units	5

Specifications

Model RCON-GW/GWG-PR

Power supply	24VDC±10%	
Control power	0.8A	
Operating ambient temperature/humidity	0~55°C, 85%RH or less, non-condensing	
Operating atmosphere	No corrosive gases, no significant dust	
Degree of protection	IP20	
Weight	158g	
External dimensions	W30mm x H115mm x D95mm	
Connector	Connector (make)	Remarks
System I/O	Cable side	DFMC1.5/5-ST-3.5 Supplied standard item
Network	Cable side	9pin D-sub connector (male) Customer's supply
	Controller side	9pin D-sub connector (female)

Network connection cable

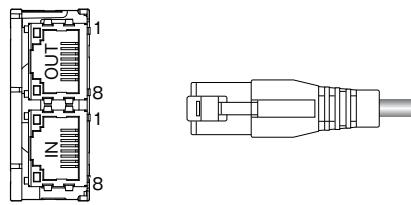

Pin NO.	Signal name (color)	Description	Adoptable wire diameter

System Configuration

Driver Unit

Features Controller unit to control actuators.
One unit can be connected up to 2 axes.

Driver Unit for connecting RCP series

Driver unit for connecting stepper motors.
All the RCP series actuators can be connected.

Model	Type	Compatible motor capacity
RCON-PC-1	1 axis connection	1.2A (□ 20/28/35/42/56)
RCON-PC-2	2 axes connection	
RCON-PCF-1	1 axis connection * for high-thrust	4A (□ 56/60/86)

Specifications

Power supply	24VDC±10%
Control power	(without brake) 0.2A (with brake, 1-axis) 0.4A (with brake, 2-axis) 0.6A
Operating ambient temperature/humidity	(without fan) 0-40°C (with fan) 0-55°C, 85%RH or less, non-condensing
Operating atmosphere	No corrosive gases, no significant dust
Degree of protection	IP20
Weight	(1 axis) 175g (2 axes) 180g
External dimensions	W22.6mm x H115mm x D95mm
Accessories	Drive power cutoff connector (DFMC1.5/2-STF-3.5)

Driver Unit for connecting RCA series

Driver unit for connecting AC servo motors.
All the RCA series actuators can be connected.

Model	Type	Compatible motor capacity
RCON-AC-1	1 axis connection	2W - 30W
RCON-AC-2	2 axes connection	

Specifications

Power supply	24VDC±10%
Control power	(without brake) 0.2A (with brake, 1-axis) 0.4A (with brake, 2-axis) 0.6A
Operating ambient temperature/humidity	(without fan) 0-40°C (with fan) 0-55°C, 85%RH or less, non-condensing
Operating atmosphere	No corrosive gases, no significant dust
Degree of protection	IP20
Weight	(1 axis) 175g (2 axes) 180g
External dimensions	W22.6mm x H115mm x D95mm
Accessories	Drive power cutoff connector (DFMC1.5/2-STF-3.5)

Driver Unit for connecting RCD series

Driver unit for connecting DC brush-less motors.
All the RCD series actuators can be connected.

Model	Type	Compatible motor capacity
RCON-DC-1	1 axis connection	3W
RCON-DC-2	2 axes connection	

Specifications

Power supply	24VDC±10%
Control power	(without brake) 0.2A (with brake, 1-axis) 0.4A (with brake, 2-axis) 0.6A
Operating ambient temperature/humidity	(without fan) 0-40°C (with fan) 0-55°C, 85%RH or less, non-condensing
Operating atmosphere	No corrosive gases, no significant dust
Degree of protection	IP20
Weight	(1 axis) 175g (2 axes) 180g
External dimensions	W22.6mm x H115mm x D95mm
Accessories	Drive power cutoff connector (DFMC1.5/2-STF-3.5)

System Configuration

Other Units

Extension Unit

Possible to operate actuators with 200V motors by means of connecting SCON-CB/CGB.

Model	
RCON-EXT	
Specifications	
Power supply	24VDC±10%
Control power	0.1A
Operating ambient temperature/humidity	0-55°C, 85%RH or less, non-condensing
Operating atmosphere	No corrosive gases, no significant dust
Degree of protection	IP20
Weight	96g
External dimensions	W22.6mm × H115mm × D95mm
Accessory	Terminal connector

Actuators that cannot be connected
Servo press type, ISA-W21, SCARA robots, TTA, ZR unit, Wrist units

Terminal Unit

An end point of serial communication of RCON and a terminal resistor of the input/output signals.
(It comes with the gateway unit as a standard supplied item.)

Model	
RCON-GW-TR	

Price is for a single unit.
The price is included in the gateway unit ordered, unless an option "TRN" is selected.

Specifications

Power supply	24VDC±10%
Control power	0.8A
Operating ambient temperature/humidity	0-55°C, 85%RH or less, non-condensing
Operating atmosphere	No corrosive gases, no significant dust
Degree of protection	IP20
Weight	48g
External dimensions	W12.6mm × H115mm × D95mm

Simple Absolute Unit

This unit is connected when an incremental actuator is used as an absolute specification.

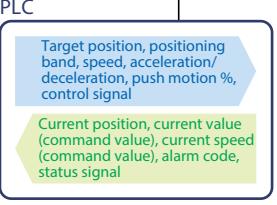

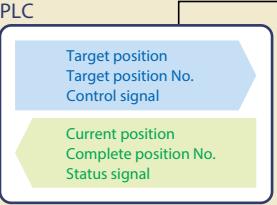

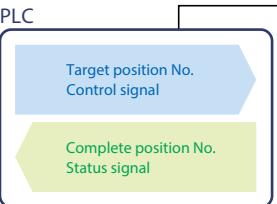

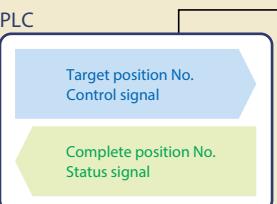

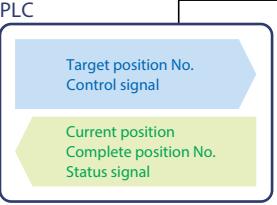

Model	Type	Compatible motor capacity
RCON-ABU-P	for RCP series	Stepper motor
RCON-ABU-A	for RCA series	AC servo motor

Specifications

Power supply	24VDC±10%
Control power	0.2A
Absolute battery model	AB-7
Battery voltage	3.6V
Charging time	Approx. 72 hours
Operating ambient temperature/humidity	0-40°C, 85%RH or less, non-condensing
Operating atmosphere	No corrosive gases, no significant dust
Degree of protection	IP20
Weight	271g (including 173g of absolute battery)
External dimensions	W22.6mm×H115mm×D95mm
Accessory	Cable (CB-ADPC-MPA005)

Field network operation mode

In the field network control operation mode, an operation is performed by one of the following control modes. The operation is performed by writing the necessary data (target position, speed, acceleration, push current value, etc.) from the host PLC device into the predetermined address.

Operation mode	Description	Overview
Direct numerical control mode	The target position, speed, acceleration/deceleration and push current limit values can be specified. In addition to the current position in 0.01mm units, the current speed and current command value can be monitored.	 <p>PLC</p> <p>Target position, positioning band, speed, acceleration/deceleration, push motion %, control signal</p> <p>Current position, current value (command value), current speed (command value), alarm code, status signal</p> <p>Communication by field network</p> <p>Actuator</p>
Simple direct numerical value mode	Target positions can be specified directly in numeric values. The current position can be monitored in 0.01mm units.	 <p>PLC</p> <p>Target position Target position No. Control signal</p> <p>Current position Complete position No. Status signal</p> <p>Communication by field network</p> <p>Actuator</p>
Positioner 1 mode	The position data can be registered up to 128 points and pauses can be made at the registered positions. The current position can be monitored in 0.01mm units.	 <p>PLC</p> <p>Target position No. Control signal</p> <p>Complete position No. Status signal</p> <p>Communication by field network</p> <p>Actuator</p>
Positioner 2 mode	The position data can be registered up to 128 points and pauses can be made at the registered positions. The current position can not be monitored. This mode contains subset data that has been eliminated transmit/receive data from the positioner 1 mode.	 <p>PLC</p> <p>Target position No. Control signal</p> <p>Complete position No. Status signal</p> <p>Communication by field network</p> <p>Actuator</p>
Positioner 3 mode	The position data can be registered up to 128 points and pauses can be made at the registered positions. The current position can not be monitored. This mode contains subset data that has been eliminated transmit/receive data from the positioner 2 mode, and controls using the minimum signals required for motions.	 <p>PLC</p> <p>Target position No. Control signal</p> <p>Complete position No. Status signal</p> <p>Communication by field network</p> <p>Actuator</p>
Positioner 5 mode	The position data can be registered up to 16 points and pauses can be made at the registered positions. The current position can not be monitored. This mode contains a subset data that has been eliminated transmit/receive data and position table from the positioner 2 mode, and the current positions can be monitored in 0.1mm units.	 <p>PLC</p> <p>Target position No. Control signal</p> <p>Current position Complete position No. Status signal</p> <p>Communication by field network</p> <p>Actuator</p>

Number of Maximum Connectable Axes

Operation mode Field network	Direct numerical control mode	Simple direct numerical mode	Positioner 1 mode	Positioner 2 mode	Positioner 3 mode	Positioner 5 mode
DeviceNet	8 axes	16 axes	16 axes	16 axes	16 axes	16 axes
CC-Link	16 axes	16 axes	16 axes	16 axes	16 axes	16 axes
CC-Link IE Field	16 axes	16 axes	16 axes	16 axes	16 axes	16 axes
PROFIBUS-DP	8 axes	16 axes	16 axes	16 axes	16 axes	16 axes
EtherCAT	8 axes	16 axes	16 axes	16 axes	16 axes	16 axes
EtherNet/IP	8 axes	16 axes	16 axes	16 axes	16 axes	16 axes

List of Functions by Operation Mode

	Direct numerical control mode	Simple direct numerical mode	Positioner 1 mode	Positioner 2 mode	Positioner 3 mode	Positioner 5 mode
Number of positioning points	No limit	128 points	128 points	128 points	128 points	16 points
Home return operation	○	○	○	○	○	○
Positioning operation	○	○	△	△	△	△
Setting of velocity and acceleration/deceleration	○	△	△	△	△	△
Different setting of acceleration and deceleration	×	△	△	△	△	△
Pitch feeding (incremental)	○	△	△	△	×	△
JOG operation	△	△	△	△	×	△
Writing position data	×	×	○	○	×	×
Push-motion operation	○	△	△	△	△	△
Speed change while travelling	○	△	△	△	△	△
Pause	○	○	○	○	○	○
Zone signal output	△ (2 points)	△ (2 points)	△ (2 points)	△ (2 points)	△ (1 point)	△ (2 points)
Position zone signal output	×	△	△	△	×	×
Overload alarm output	○	○	○	○	×	○
Damping control (Note 1)	×	△	△	△	△	△
Read current value (Note 2) (Resolution)	○ (0.01mm)	○ (0.01mm)	○ (0.01mm)	×	×	○ (Note 3) (0.01mm)

*○: Direct setting possible, △: Position data or parameter input is needed, ×: Operation not possible.

(Note 1) Function limited to AC servo motor specification.

(Note 2) When a SCON controller is used to control a DDA motor, the resolution is 0.001 degrees (0.01 degrees in positioner 5 mode).

(Note 3) The maximum output value in the positioner 5 mode is 3,276.7mm (327.67 degrees for DDA motor).

When controlling the actuator in an operation range exceeding the maximum value, please use another operation mode.

Option

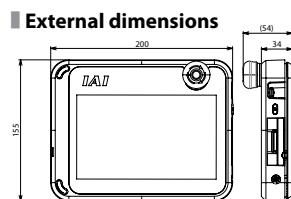

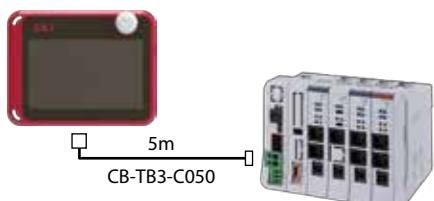

Touch Panel Teaching Pendant

Features Teaching device with functions such as position input, trial run and monitoring.

Model TB-03-□

Please visit IAI website for compatible versions.

Configuration

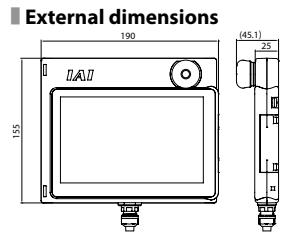

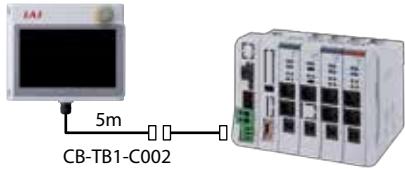

Specification

Rated voltage	24VDC
Power consumption	3.6W or smaller (150mA or smaller)
Ambient operational temperature	0 to 40°C
Ambient operational humidity	20 to 85% RH (non-condensing)
Protection class	IPX0
Weight	670g (in case of TB-03 main unit only)
Charging method	Dedicated AC adapter / Wired connection with controller
Wireless connection	Bluetooth 4.2 Class 2

Model TB-02(D)-□

Please visit IAI website for compatible versions.

Configuration

Specification

Rated voltage	24VDC
Power consumption	3.6W or smaller (150mA or smaller)
Ambient operational temperature	0 to 40°C
Ambient operational humidity	20 to 85% RH (non-condensing)
Protection class	IP20
Weight	470g (in case of TB-02 main unit only)

PC dedicated Teaching Software (Windows only)

Features Startup supporting software for position input, trial run and monitoring, etc.

Reduces the startup time by substantial supporting functions necessary for adjustments.

Model IA-OS

Configuration

Please visit IAI website for compatible versions.

for Windows 7/10

Model RCM-101-MW (with external device communication cable + RS232 conversion unit)

Configuration

Please visit IAI website for compatible versions.

24V Power Supply

Overview Power supply unit that has the same height as the RCON's and that can be installed easily.
It can also monitor the status of power supply by connecting the RCON.

Model PSA-24 (without fan)

Model PSA-24L (with fan)

Specification Table

Model	Specification	
	AC100V input	AC200V input
Input power voltage range	AC100V - AC230V±10%	
Input power current	3.9A or smaller	1.9A or smaller
Power supply capacity RCON-PC-2	without fan: 250VA with fan: 390VA	without fan: 280VA with fan: 380VA
Rush current ^①	without fan: 17A (typ) with fan: 27.4A (typ)	without fan: 34A (typ) with fan: 54.8A (typ)
Calorific value	28.6W	20.4W
Output voltage range ^②	24V±10%	
Continuous rated output	Without fan: 8.5A (204W), with fan: 13.8A (330W)	
Peak output	17A (408W)	
Efficiency	86% or higher	90% or higher
Parallel linkage ^③	Max. 5 units	

*1 The pulse duration of the rush current is 5ms or smaller.

*2 To enable parallel operations, this power supply unit can change output voltage according to load. For this reason, this power supply unit is dedicated to IAI controllers.

*3 Parallel connections under the following conditions are not possible.

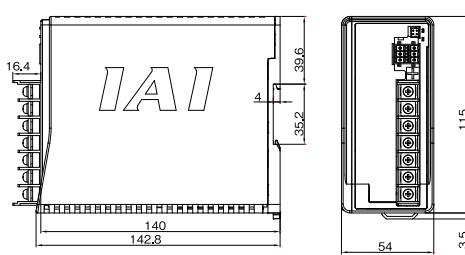

* Parallel connections of PSA-24 (without fan specification) and PSA-24L (with fan specification).

* Parallel connections with the power supply units other than this unit.

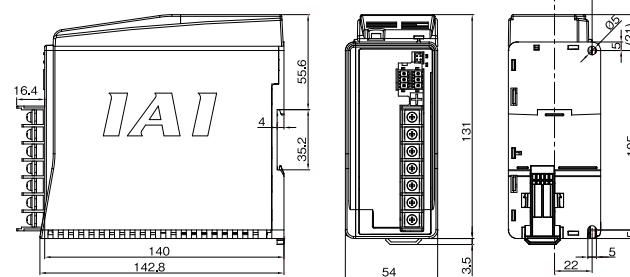

* Parallel connection with PS-24.

Maintenance Parts

Fan Unit

Overview Option to forced-cool the driver unit.
One fan unit is necessary for 2 driver units.

Model RCON-FU

Dummy Plug

Overview Necessary for safety category compliant specification (GWG).

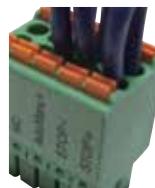

Model DP-5

System I/O Connector

Overview Connector for emergency stop input and external input to change operation mode, etc.

Model DFMC1.5/5-ST-3.5

Drive Power Cutoff Connector

Overview Connector for input of the drive power cutoff

Model DFMC1.5/2-STF-3.5

Terminal Connector

Overview Necessary as a terminal resistor when connecting SCON.

Model RCON-EXT-TR

Replacement Battery

Overview Replacement battery for simple absolute unit.

Model AB-7

Maintenance Parts (Cables)

When ordering maintenance cables after the purchase of the product, please refer to the following model numbers.

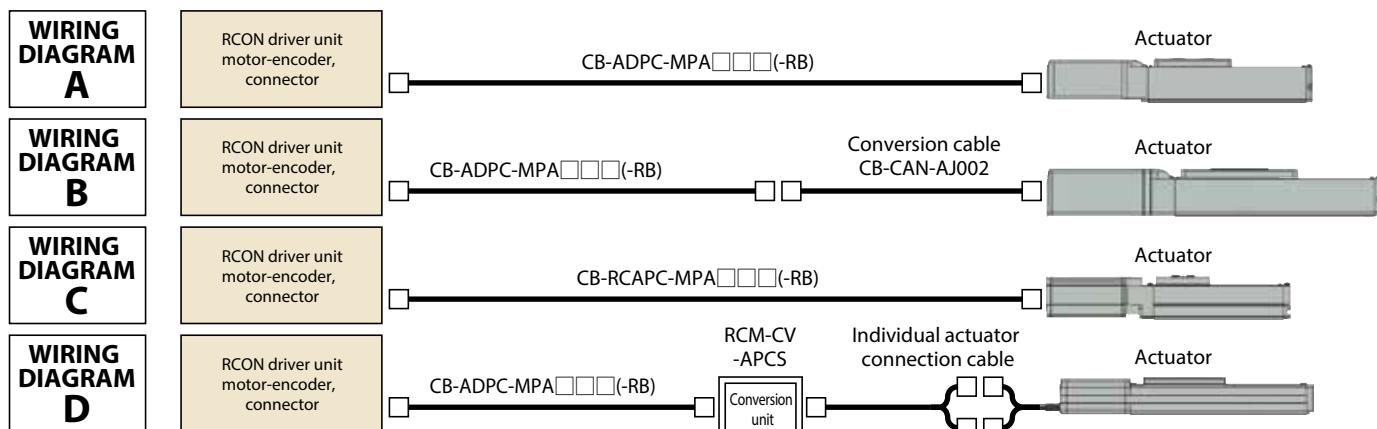

Table of Cables

No.	Actuator		Applicable controller model number	RCON connecting cable (Note 2) (-RB: Robot cable) [Connecting cable for actuators]	Conversion unit	Wiring diagram

Model CB-RPSEP-MPA□□□ * Robot cable is the standard.

*Specify the cable length (L) in □□□, Maximum 20m. Ex) 080=8m.

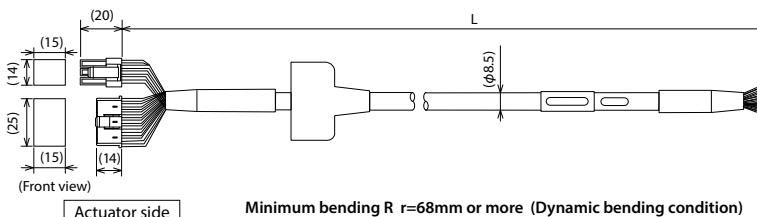

Model CB-CFA-MPA□□□/CB-CFA-MPA□□□-RB * Robot cable is the standard.

(Note 1) When the cable length is 3m or longer, non-robot cable diameter is Φ9.1 and robot cable diameter is Φ10.

*Specify the cable length (L) in □□□, Maximum 20m. Ex) 080=8m.

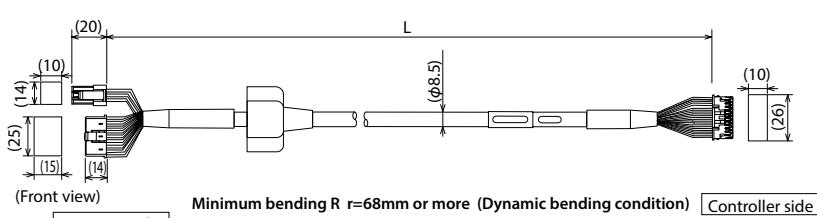

Model CB-PSEP-MPA□□□ * Robot cable is the standard.

Actuator side SLP-06V(JST) XMP-18V(JST)		Controller side PADP-24V-1-S (JST)
